RAP is the party of restoration and transformation, grounded in responsible stewardship of human, natural, and capital resources. Our approach will ensure that the country's assets serve as catalysts for prosperity, paving the way for future generations.

We have structured our governance agenda around Five Pillars of Restoration and Progressive Transformation, each supported by 44 carefully crafted Focus Areas. These pillars address core national issues through pragmatic, results-oriented strategies designed to foster sustainable development, strengthen institutions, and empower every Kenyan for a more prosperous and equitable future. The pillars are:

Most importantly RAP will deliver this vision for you, the people and several generations that will come after us, —Mambo Sawa Sawa! —better days lie ahead!

RAP VISION & PLAN

The Restoration Alliance Party (RAP) vision is to transform Kenya into “the Nation of Opportunities”; a top emerging income country with wealth distributed fairly across society. We believe as RAP that the future of our country depends on our ability to restore and progressively transform the dignity of the people and the Nation of Kenya. In order for Kenya to be a country that would be emulated as a mirror of democracy and a pace-setter of economic progressive transformation in the Continent of Africa, RAP will adhere itself to democratic principles that underpins our constitution. Alongside this, a Kenya that has Africa’s leading public services to enable Kenyan Citizens to proclaim themselves as members of a proud, prosperous and dynamic democracy.

However, the situation today is worrying. It is a grim fact that Kenya’s economy in terms of GDP per person has grown little in the last 60 years. Whereas, it should have grown by a factor of ten or twenty - as has happened in many other economies in the world. There is high epidemic level of poverty, high unemployment, lack of economic opportunities, poor education structures, healthcare and struggling democratic institutions. We believe that effective development and implementation of rigorously researched, insightful and responsible socio-economic and political policies will ensure sustainable wealth creation and economic development for the benefit of the 50 million plus Kenyans. We remain committed to the Africa Union Agenda 2063 of Pan-Africanism and African Renaissance as a pillar of our socio economic and political transformation;-The Africa We Want!

RAP has been built on the principle that there is an alternative and another way of doing things for the Kenyan people. At the heart of our new vision for Kenya, is the restoration and progressive transformation of the Kenyan Economy to the Nation of Opportunities. We will oversee an unparalleled programme of investment enablers across the country and in economic sectors such as Agriculture, Mining, Tourism, Technology & innovation, Industrialization and Services sectors. This restoration and progressive transformation will see to it that Kenyan economy grow in size by a factor of five to ten times over a period of five years when we get into power in the next elections of August 2027. This will require marshalling and mobilization of tens of billions of dollars through foreign direct investments and export of agricultural produce as well as mining products for which RAP’s leadership is uniquely placed to achieve. We will fight to ensure that this tremendous growth is shared across the country and throughout society for young and old, men and women. It is only by having a more equal society will the restoration and progressive transformation be actualized. The RAP will make sure that the domestic Kenyan market becomes an engine of growth for the country. For that to happen we need everyone to be a stakeholder and market consumer, not just a small few.

This manifesto outlines RAP's comprehensive plans for the future. We have diligently examined the complex and interconnected issues facing our nation and have sought real solutions by drawing on experiences from Kenya, the EAC region, Africa, our Southern Hemisphere partners, and the broader global community. RAP is committed to economic restoration and progressive transformation, earning the trust of Kenyans to manage our national resources—human, natural, and capital—effectively. Our goal is to create abundant opportunities for all Kenyans.

Our vision is bold! Our vision is unprecedented! Our vision is real! Our vision is promising! Our vision will change the lives of Kenyans for the best. Most importantly RAP will deliver this vision for you, the people and several generations that will come after us.
